SKILLS

Languages: JavaScript, Node.js, Python, SQL, HTML, CSS

Frameworks/Tools: React, Redux, Express, Sequelize, Flask, SQLAlchemy, PostgreSQL, SQLite3, Docker

Key Skills: Git, Pair Programming, Agile Development, Scrum methodologies, Object-Oriented Programming

PROJECTS

Linkit (Flask, ReactJS, Python, JavaScript, SQLAlchemy)

[live](#) | [github](#)

A recreation of the popular social media website, Reddit

- Developed a single page web application built using functional React components that utilizes Redux to manage state and persist data between components.
- Create custom Modal context for use in frontend components allowing for streamlined React component development.
- Developed an intuitive frontend where users can interact seamlessly with the UI.
- Designed a RESTful API and used it to implement the communities, posts, comments, and votes features.

Buy-KTsy (Flask, ReactJS, Python, JavaScript, SQLAlchemy, Docker)

[live](#) | [github](#)

E-commerce website based off of Etsy

- Wrote RESTful API routes for products and reviews features allowing users to create, read, update and delete their own products and reviews.
- Improved efficiency of feature CRUD operations by designing normalized data in Redux State Shape.
- Implemented dynamic search bar for smooth user experience when searching for products.
- Managed project workflow and deployment with collaborators through git.

Clonebnb (Express, ReactJS, JavaScript, Sequelize, PostgreSQL)

[live](#) | [github](#)

A clone of the short term rental housing E-marketplace, Airbnb

- Managed user rentals, reviews and booking CRUD with database operations using the Sequelize ORM.
- Built both frontend and backend custom error handling to protect the database from unexpected user data inputs.
- Developed Postman tests for backend API routes, optimizing debugging workflow and ensuring accurate route handlers.
- Created a user friendly experience with vanilla css for ease of use.

EXPERIENCE

Cashier

Whole Foods Market

Oct 2016 - Jan 2019

- Provided exceptional customer service while accurately and efficiently entering sales at the cash register.
- Covered shifts in grocery, maintenance, meat and seafood departments.
- Made deliveries while communicating with clients, allowing for just-in-time purchase orders.
- Trained 10+ new employees on how to operate POS machines and produce PLU codes.

Waiter

Pattaya Bar and Grill

Mar 2013 - Jun 2014

- Collaborated with kitchen and other wait staff members to ensure orders went out in an efficient and orderly manner.
- Maintained and cleaned tables, floors, and bathrooms to ensure a hygienic and pleasant dining experience.
- Operated POS terminal and audited the cash drawer to ensure the amount was correct.

EDUCATION

Web Development - App Academy | Spring 2022

BA Economics - University of California, Santa Barbara | 2020
